

# Automaton

## Jamiroquai

In my love  
Every heart is beating  
I'm all love  
Can't you feel me feeling?  
Take my hand  
Cold like a junkie  
I'm an ice cold man  
(I'm an ice cold man)  
Why am I crying for you? All this love I felt for you  
Has gone away to another place  
(It's a digital life)  
I put my faith in a digital world  
When they've given me  
Eyes without a face  
I'd steal the moon on silver nights  
Remind myself I am someone  
My soul is numb and for tonight  
I'm automaton  
I'm so tough  
Can't you see me running?  
See, I can touch  
Can you feel me coming?  
I see the world  
In claws of freedom  
These metal eyes, they can't disguise  
The fact that I  
Need something to believe in  
But then I drug him for you I said goodbye to the world I knew  
And took off into inner space  
(It's a digital life)  
Weren't you the ones who promised me  
A very different place?  
I've powered up, get my program set  
And turn my head toward the sun  
Inside I know, I'm not a void  
I'm automaton  
Automaton  
Automaton  
Automaton

Automaton

Hey, you got me down underground  
Gettin' holed up in my cyber lounge  
As if I had time to break that down

(Automaton)

Whatever you can do I can override it  
Got a million ways to synthesize it  
Digital android, I can fight it

Fight it out

Automaton

(It's a digital life)

Automaton

(Digital life)

Automaton

(A digital life)

Automaton Feel like a man who said to us

That this is not where I belong

They rule my life from a metal box

That's windowless

And I wonder where it all goes wrong

Maybe this dream will stay alive

But can the madness be undone?

Am I the new intelligence? I'm automaton

I'm automaton

I'm automaton

I'm automaton

I'm automaton

I'm automaton

I'm automaton

It's a digital life

It's a digital life

You know I need something I can hold onto, hold onto

(You were all I knew)

(I'm automaton)

I need something

I can hold onto, hold onto

(This was all I knew)
