

# Different (feat. Clyde Carson)

## Goapele

(Verse one)

I'm looking at you from a distance  
I'm wondering how all my feelings changed  
Do you remember even half the shit we used to do  
And how it used to be  
I wish it was different  
All these feelings ???  
But I still believe  
(I mean what are you saying then, damn)(chorus 1)  
That it could be different  
(You know I miss the butterflies, the look in your eyes, how they would shine)  
It could be different  
(And now it feels like it's over baby)  
That it could be different  
(If you would realize that you need to set aside just a little time to..)  
It could be different

I know we can make it better baby(Verse Two)

No I can't keep living on memories  
What if where this is turning  
This isn't meant to be  
We used to get lifted  
The love we craved it so insatiably  
And lately I've been missing all the little things(Rap One)  
Maybe I got comfortable with the way you was treating me  
Hot meals cooked up, way you would feed me  
I'm selfish, how could I let my fear defeat me  
Scared of something different, and I see you complete me  
But ay I don't like to argue a bit  
I promise I'll change if I ain't gotta hear your lip  
Oh I'm sorry, I'm saying  
But you don't respect  
You don't listen you're no different  
(Shit, Goddamn it)  
Save your breath(Chorus 2)  
That it could be different  
(I know you saying I should change, through out time I ain't the same in my ways)  
It could be different  
(and now it feels like it's over babe)  
(I see you're feelings start to fade, it's all my fault huh' your feelings ain't the same)

That it could be different  
(Ma, why is you mad, acting like everything I do is bad)  
It could be different  
(You got some issues too, listen it ain't nothing we can't get through)  
I know we can make it better baby(Bridge)  
You're high I'm low  
And still this distance seems to grab a hold  
I miss you so and making love still feels like coming home  
We fuss we fight I leave  
You might But then you make it right  
But still at night I can't stand the sight of you not in my life(Chorus one)  
That it could be different  
(You know I miss the butterflies, the look in your eyes, how they would shine)  
It could be different  
(And now it feels like it's over baby)  
That it could be different  
(If you would realize that you need to set aside just a little time to..)  
It could be different  
I know we can make it better baby(Rap2)  
Lets take it back to the picnics at Tillman  
Flicks with the children  
Talks by the lake  
Walks through your building  
The feeling of fresh love  
Can't dismiss this  
I know that you miss it  
My permanent missus  
Permanent Kisses  
The flirting and wishing  
Before all the back and forth huffing and hissing  
Hear me and listen  
I remember our mission  
So I'm willing to change if you say that I'm different(Chorus 2)  
That it could be different  
(I know you saying I should change, through out time I ain't the same in my ways)  
It could be different  
(and now it feels like it's over babe)  
(I see you're feelings start to fade, it's all my fault huh' your feelings ain't the same)  
That it could be different  
(Ma, why is you mad, acting like everything I do is bad)  
It could be different  
(You got some issues too, listen it ain't nothing we can't get through)  
I know we can make it better baby(chorus 1)  
That it could be different  
(You know I miss the butterflies, the look in your eyes, how they would shine)

It could be different  
(And now it feels like it's over baby)  
That it could be different  
(If you would realize that you need to set aside just a little time to..)  
It could be different  
I know we can make it better baby
