

# Money Mile

## Alison Moyet

    Into your car park drive obsolete motors  
    With petrol consumption at too higher price  
    Sell us through windows at back room board meetings

Blindfolded and handcuffed and in single file  
On your money mile, we are the faceless, the nameless, the homeless

    On your money mile, there in your fortress where you couldn't care less

    On your money mile, we are the caseless, the raceless, the hopeless

    On your money mile, you were caught in the crossfire

Hauling the flag right down, hauling the flag right down  
Send us to battle, send us to the front line  
    Point us at the enemy, lest we forget

    It's for our protection that we lay here slaughtered

It's for our survival we bury our dead  
On your money mile, we are the faceless, the nameless, the homeless

    On your money mile, there in your fortress where you couldn't care less

    On your money mile, we are the caseless, the raceless, the hopeless

    On your money mile, you were caught in the crossfire

Hauling the flag right down, hauling the flag right down  
On your money mile

    On your money mile

    On your money mile

    On your money mile  
    On your money
