

# Time Stands Still (feat. Dwele)

DJ Quik

All I want is for my time with you to slow down  
Don't really make it in town like I used to  
So for now  
All I want is for my time with you to slow down  
Don't really make it in town like I used to  
So for now I appreciate your patience  
What am I doin' without you?  
Never hear no bad shit out here  
In the streets about you Love just must have made you smart  
Jealousy is the counterpart  
Life has made us stripped apart  
No more willing to embark But we remained friends throughout  
All those years from then to now  
Both those feelings trust and doubt  
Argue until you storm out Other dude gave you a kid  
He didn't have you like I did  
I pieced you out and then y'all broke up  
And you called me again Drunk and crying on the phone  
Next flight out you gon' be home  
Flight delayed, I still wait  
Call me when you reach the gate Pick you up at baggage claim  
Tunnel vision just begun  
'Cause you and your son  
Look like you and my son All I want is for my time with you to slow down  
Don't really make it in town like I used to  
So for now  
All I want is for my time with you to slow down  
Don't really make it in town like I used to  
So for now All I need is more time  
Is having you right beside me, you're mine  
And only for a couple minutes more, slow down  
Somebody say five and time a pillow Know that if I could then I would pay full time  
On some major shit, slow down  
Dodgin' every minute like a bullet  
Somebody say five and time a pillow Let me get your bags out of the truck  
Get the keys and go upstairs  
Cover tattoos on your arm  
That's just memories, souvenirs We got plans tonight  
We goin' to the cheese cake factory

And drink a little and reminisce about  
How you used to laugh at me You didn't think I would go too far  
I mean being from Compton and all  
But still I grabbed some corks, some yarn  
And rubber and made myself a ball I know your momma proud of me  
'Cause she looked down on me  
She knew I had it  
She said that I would make it if I just stayed at it Now how's your niece  
The one who used to stay with you  
When you lived on over by the street  
The one who like my nephew Kiana  
She used to do her hair like Rihanna  
You remember my Why you kiss me when I'm talking?  
Just had to bring back all them old memories  
So you ready to go?  
You sure you don't wanna another drink?  
Okay, let me get the check All I need is more time  
Is having you right beside me, you're mine  
And only for a couple minutes more, slow down  
Somebody say five and time a pillow Know that if I could then I would pay full time  
On some major shit, slow down  
Dodgin' every minute like a bullet  
Somebody say five and time a pillow, a pillow, a pillow All I want is for my time with you to slow down  
Don't really make it in town like I used to  
So for now  
All I want is for my time with you to slow down  
Don't really make it in town like I used to  
So for now
