

King Of Ska

Desmond Dekker

Take your time, take time for the king is back,
Take your time, you've got to know that the king is back
Take your time, beware, for he's right on top
Take your time, you've got to know that the king is back Don't rush it, man, you will surely lose it
I am going to burn your skin like a blazing fire So take your time, take time for the king is back
Take your time, you've got to know that the king is back
Take your time, beware, for he's right on top
Take your time, you've got to know that the king is back I want you to know who's the king of the ska
The king of the ska is right here on top So take your time, take time for the king is back
Take your time, you've got to know that the king is back
Take your time, beware, for he's right on top
The king is back, right here, and he's right on top Take your time, take time for the king is back
Take your time, you've got to know that the king is back
Take your time, beware, for he's right on top
Take your time, you've got to know that the king is back I want you to know who's the king of the ska
The king of the ska is right here on top So take your time, take time for the king is back
Take your time, you've got to know that the king is back
Take your time, beware, for he's right on top
The king is back, right here, and he's right on top
