

Split the Time

The Suicide Machines

What were you doing when you did the things you did
What were you saying when you said the things you said
No I can't comprehend anything you're saying
I don't understand this fucked up game you're playing
Okay, we've come full circle and are you willing to stand
By what you said, 'cause I'm not willing to go around and
Around with you any longer
It's time to split the time
It's time to split the time
Between you and me, can't you see?
If we can just agree to disagree instead of
Fighting all the time without ever understanding
I never have a clue what you're ever fucking thinking
You don't make sense you talking nonsense all day
Okay, we've come full circle and are you willing to stand
By what you said, 'cause I'm not willing to go around and
Around with you any longer
It's time to split the time
It's time to split the time
It's time to split the time
Between you and me, can't you see?
It's time to split the time
It's time to split the time
It's time to split the time
Between you and me, can't you see?
I know we'll get by this time
I know we'll get by
Everything is gonna be alright
It's gonna be okay
I know we'll get by this time
I know we'll get by
Everything is gonna be alright
It's gonna be okay
It's gonna be okay
It's time to split the time
It's time to split the time
It's time to split the time
Between you and me, can't you see?
It's time to split the time
It's time to split the time
It's time to split the time
Between you and me, can't you see?
