

Young Heart

Vanessa Carlton

I know the seasons, they change for a reason
But I can't tell spring, summer, winter apart
Cause my eyes see one colour, my mouth tastes one taste
All of the beauty and nuance you take I've always loved you, haven't always loved you right
I had no direction I had no clear sight
But now that I'm older and I've moved through the times
I wanna love you and I wanna love you right
Wanna love you right But I had a young heart, a sharp narrow view
I was a coward couldn't hand it to you And I've always loved you, haven't always loved you
I had no direction I had no clear sight
But now that I'm older and I've moved through the times
I wanna love you and I wanna love you right When you go, when you go I will follow
When you go, when you go, when you go I will follow Oh but now that I'm older I've moved through the times
I wanna love you and I wanna love you right
Wanna love you right
Wanna love you right
