

# Victory

## Chester Bay

I won't go righting all the wrongs  
Risk the writings on the walls just to cover up your innocence.  
But I won't be just a face among the crowd  
Blending in, avoiding situations bound to bring us down  
Be with meVictory, you're all I need and you're all I've wanted to seeI won't dress up and save the world  
Dodge a bullet, dive 600 feet while lighting up your movie screens  
But I won't waste every hour getting wasted by the fire  
Without you, without you thereVictory, you're all I need and you're all I've wanted to see  
Together we can win, so take my hand and show me where to beginYou know there's ups and downs that get  
you out, throw you to the ground  
And everytime you turn around, the sun goes down and there's no sound  
But darkness turns to light, our fire burns bright here  
Waiting for youVictory, you're all I need and you're all I've wanted to see  
Together we can win, so take my hand and show me where to begin  
(2x)Show me where to begin
