

Changes

Sugar

I want somethin' like I remember
And I want somethin', that lasts forever
I remember times you said
That you'd be true to me Look at how the weather's changin'
(Changes, changes)
Look how it's changin'
(Changes, changes)
(Changes, changes) I'm accustomed to your deception
Comes the rule with no exception
And I've been dragged across the river
Running far and wide Come and see how I feel inside
(Changes, changes)
Look how it's changin'
(Change, changes)
(Changes, changes) Change for the better
Change for the worse
Changes with summer and fall Now you're a stranger
Spare me some change
So I can find someone to call my own Changes, changes
Changes, changes
Changes, changes Changes, changes
Changes, changes
Changes, changes And now that winter has fallen upon us
(Changes, changes)
I need somethin' that's warm and honest
(Changes, changes)
And if I found someone who thinks
That they'll be true to me I really wouldn't wanna change it
(Changes, changes)
Look how it's changin'
(Changes, changes)
(Changes, changes) I have seen, I have seen
What these changes mean to me
If you're thinkin' of changin'
If you're thinkin' of stayin' with me We need to agree
We need to make some changes
We need what we need
Do I need you? Do you need me? Changes, these changes
Changes, these changes

Changes, these changes
Changes, these changes
