Faded Lines

Secret Machines

Faced with lies Don't you think that you just lie? Caught inside Worlds made mostly of liesMake up your mind 'Cause it's all we love That's all Just faded linesOverwhelmed Overjoyed is the same Beneath the stillness The place where coldness meets coldMake up your mind 'Cause it's all we love That's all Just faded linesAnd what else? Make up your mind 'Cause it's all we love That's all Just faded linesYeah, I was scared The seconds dripped past so slow But I just stood there
