

Leave This

A Protest Against Futility

This short time wish would end
You would never dare
Fantasize in agony
Who would really care
Of the soul you pray to
Tastes them all but you
All mankind all of time
Lies in what you do

Searching for do you know
No one sees this show

Feel free to leave this behind
No use in wrecking your mind
This disease will keep you blind
To the life you're passing by

Tear the skin bleed right through
Stealing something new
Suffer for all our sins
Nowhere to begin
Every scene every dream
Nothing as it seems
All in stride against you
Really think it's true

Happiness not a goal
Just have to let go

Led astray down to defeat
Easy choice there nice and neat
Clawing onto for too long
Don't look back now it's all gone
All alone here losing trust
One of you is all of us
This path you're on is no more
Lay your head down fix the score
Feed your hunger need no more
