Binary Love

Blake Lewis

You tempt me with a single touch
You're turnin' me on, you've powered me up
My memory is burnin' up
So press stop before you're any closer
System overload, you move it like a pro
Your body language is comin' to me in stereo
It seems that you were made for me
I'm programmed to love and make you mine
Your binary love, my binary love
Love, there's nothin' left to do but take your time
Your binary love, my binary love
So let imagination start to take control
Your binary love, my binary love
So systematically we're made to be alone
Your binary love, my binary love
So tell me
Have you ever felt a connection this strong?
Dynamic symmetry
The way we move is like electric poetry in motion
Sensory overload, define original
So doctor frequency comin' to me in stereo
It seems that you were made for me
I'm programmed to love and make you mine
Your binary love, my binary love
Love, there's nothin' left to do but take your time
Your binary love, my binary love
So let imagination start to take control
Your binary love, my binary love
So systematically we're made to be alone
Your binary love, my binary love
Binary love, binary love
Floatin' through time and space
The world feels so far away
We're connected through our binary love
Floatin' through time and space
The world feels so far away
We're connected through our binary love
I'm programmed to love and make you mine
Your binary love, my binary love

Love, there's nothin' left to do but take your time
Your binary love, my binary love
So let imagination start to take control
Your binary love, my binary love
So systematically we're made to be alone
Your binary love, my binary love
