

# When You Called My Name

## Newsboys

I want to preach the word, they want massages  
I check chapter and verse, they check their watches  
I spy another yawn, I might as well be gone  
Let's stand and say, "Amen" Some days I must admit, I still don't get this  
Couldn't be it's time to quit when days get like this  
I slip into the night then stumble towards the light  
Wake up and try again When You called my name  
I didn't know how far the calling went  
When You called my name  
I didn't know what that word really meant  
When I recall Your call I feel so small  
When I recall Your call I feel so small Could be I'm losing touch, could be they don't care  
Lord knows I don't know much, Lord knows I've been there  
I trip toward my retreat, I fall down at Your feet  
Get up and try again When You called my name  
I didn't know how far the calling went  
When You called my name  
I didn't know what that word really meant  
When I recall Your call I feel so small Lord what did You see when You called out for me?  
I start losing heart and then it comes again  
Lifted from despair by the prayers of someone  
Lifted from despair by the prayers of someone When You called my name  
I didn't know how far this calling went  
When You called my name  
I didn't know what that word really meant When You called my name  
When You called my name
