

# Elect Death For President

Wednesday 13

Rise your wrist up in the air  
And wave your razorblades like you just don't care  
Use your voice, make homicide your choice  
Politics coming straight from the crypt  
Stirring up the world with its ugly stick  
Put your faith in a shallow grave today  
Red, yellow, black or white  
It doesn't matter, everyone dies tonight  
Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death  
Hooray for homicide  
My left wing's baked and my right wing's fried  
Vote for me and I'll legalize everything  
Splish splash you're in a blood bath  
Intentionally headed down the wrong path  
But a dollar sign won't make you smile in your grave  
Red, yellow, black or white  
It doesn't matter, everyone dies tonight  
Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death  
I'm on your side!  
Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death  
Vote for me!  
Red, yellow, black or white  
It doesn't matter, everyone dies tonight  
Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death  
Trust in me  
Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death
