Neighborhoods

Drawing Trees

We run around in circles
When circles are kept in larger squares
Searching for your lover's equation
Even though she has always been thereI've got to be the one
The one to be with you
I can open doors
I will never loseDon't stand so closely to your neighbors
Slowly she too embrace his friends
Living in an awkward silence
Still no solution for an endI've got to be the one
The one to be with you
I can open doors
I will never lose
