Irrational

Joselin

I know it's so irrational
Don't you lose yourself
On your own are you someone else?

Are you alright being alone again?
You know it's fine to be worrying

I promise I will get better
I wish that I could be better than that

When you miss someone
Do you wish you were them
When you miss someone
Do you wish you were them?

I promise I will get better
I wish that I could be better than that

I promise I will get better
I wish that I could be better than that
I promise I am better
I wish that I could be better than I am

Do I even know you at all
I know you say it's "irrational,"
Why do I feel like I am gone
It takes so long
It takes so long

And you wonder why you're even here at all
There's already so many people
And you wonder why you're even here at all
There's already so many people here
There's so many people here

I won't lose myself
I won't lose myself
Don't you lose yourself
I won't lose myself
