In Our Way

Calico System

We sit on the bottom rung of life
overlooked almost every day
We cannot taste but always chase our dreams
And I like to set it straight
this malfunctioning state of affairs
we trapped ourselves in accidentallyTogether we break out, we break away
Together we break out, we break away
We just want a chance to change some things
and live our lives without scrutinyWe'll take a running start
and head stomp anyone in our way
This is the way our generation will handle things
and I know we're worth way more than the credit
that they'd give to us
It's just a lack of respect or ignoranceTogether we break out, we break away
Together we break out, we break away
We just want a chance to change some things
and live our lives without scrutinyAnd I think they'd rather break our backs in silence
And they'd probably provoke attacks in an instance
And who knows how violent we'll react if we stay silent
That's why we're ready to react in an instantTogether we break out, we break away
Together we break out, we break away
We just want a chance to change some things
and live our lives without scrutinyWe just want a chance to change some things
and live our lives
