No Love Lost

Joy Division

So long sitting here
Didn't hear the warning
Waiting for the tape to runWe've been moving around
In different situations
Knowing that the time would comeJust to see you torn apart
Witness to your empty heartI need it
I need it
I need itNo love lost
No love lostYou've been seeing things
In darkness, not in learning
Hoping that the truth will passNo life underground
Wasting never changing
Wishing that this day won't lastTo never see you show your age
To watch until the beauty fadesI need it
I need it
I need it
