

No Love Lost

Joy Division

So long sitting here
Didn't hear the warning
Waiting for the tape to run We've been moving around
In different situations
Knowing that the time would come Just to see you torn apart
Witness to your empty heart I need it
I need it
I need it No love lost
No love lost You've been seeing things
In darkness, not in learning
Hoping that the truth will pass No life underground
Wasting never changing
Wishing that this day won't last To never see you show your age
To watch until the beauty fades I need it
I need it
I need it
