

# Blossom

## Makari

Strange to see this place so impaired  
False judgment made us aware. We built this from the bottom up  
Set the ranks high, lock-loaded  
Fill our hearts with the passion  
To set us...On our way  
We felt free this way. I can feel the weight settling into me  
What would be the easiest way to go? Satisfy this heart  
Satisfy this soul  
Will you carry me through the day and night when my legs give out?  
Will you carry me through the day and night?  
We're on our way  
We felt free this way  
I can feel it in my veins  
We'll get to this place; we're on our way. Time will only tell if we shape the future in our way  
So tell me fate's not just  
Some fucked-up line in a movie  
Where we all play along  
We all fall for the same things, Beginning to ending; we head to the exit feeling empty. We're on our way  
We felt free this way  
I can feel it in my veins  
We'll get to this place; we're on our way. Will you carry me through the day And night when my legs give out?  
Will you carry me through the day And night?  
We're on our way  
We felt free this way  
I can feel it in my veins  
We'll get to This place; we're on our way.
