

# On Standby

[Dibia\\$e](#)

Would you stay on standby?  
Because I need another alibi  
In the wrong place at the wrong time Could you talk a fine line?  
I need to know that I'll be fine  
Bulletproof It's like I've never been born  
We conceive in the alleyways  
It's like I've never been born We believe in other ways  
That you do and you did  
And there's proof  
That we did wrong tonight Could you sense a tragedy?  
Because I saw it on the BBC  
There's a panel on that channel Could you walk a narrow line?  
I need to know I'll serve my time  
With some use It's like I've never been born  
We conceive in the alleyways  
It's like I've never been born We believe in other ways  
That you do and you did  
And there's proof  
That we did wrong tonight And tonight  
You can cry if you want to  
But it won't help you You can cry if you want to  
But it won't help you  
To get you through this crime  
It will plague you standby It's like I've never been born  
We conceive in the alleyways  
It's like I've never been born We believe in other ways  
That you do and you did  
And there's proof  
That we did wrong tonight We did wrong, we did wrong
