

# Swallowtail

## Finger Eleven

Let me in  
And let me go  
Tell me that  
I need to know Swallow the key swallow the key  
You feel compelled but its far too late to try and tell me now  
So I'll try to suck it out  
Open mouth feels warm  
Secrets swollen so sore We all know and we can't ask why  
You turned into an ugly butterfly  
That shape of you  
Closes in and forms a shade of grey  
Hanging over hanging me Sorry you're gone  
The voices they left me thinking  
The words that I've forgotten now  
Try to come but can't come out
