

# The Obvious Destination

## Candiria

Advisory - the following lyrics contain explicit language:

Chapter one  
Downcast of shadows, the self denied  
The self denied of hidden places  
Lost passages, pure volatile  
Dripping from the cracks that keep you  
Lost in parables  
Convulsions of the epileptic kingdoms that bestow  
Clean thorough antiseptic  
Scrubbing deep into the bone  
Condensing the marrow  
Taste perfected  
The cattle won't disown  
The human man must be inspected  
If I were to touch you  
Would you wither in my arms?  
And if I were to love you  
Would you motion to disarm?  
Sense of warning  
Chapter two  
Rigid from the petrified essence  
Estimated measures  
Celestial in my presence  
A stew of precious treasurers  
Reaction from the casualties  
That surround me slithering  
A transparent excess suppressing  
Pull the lever  
Chapter three  
Fall infected down  
Miracles designed for success  
All of us, are you harvesting with the maggots?  
Falling hard with dung on your breath  
Infesting what is pure and damaged  
Like swarms of locust feeding  
Born first, still in needing  
Chapter four  
Alert the dogs flee an expert on penalty  
Without vision the birds of the air will  
Pick at your skull, calloused clothed in darkness  
Tragedies turn providing alternatives  
Development additives sediments  
Firm evolving supporting the process  
Dedicated moments of silence  
Chapter five  
Quest of the new  
Increasing the magnification of your velocity  
Would this be considered growth through hypocrisy

Advancement merging with the contents of the universe  
The focus of enhancement  
Evacuate the premises that continue to revolve  
Cluttering of arrangements that continue to dissolve  
You accelerate beyond the surrounding borders  
Maintain the order, irradiation  
The newest method of preservation  
Radioactive spastic and down for the cause  
Spoiled by mold, nuclear turbines  
Fool injected outlawed Newton's third law of motion
