

# Will the Guns Come Out

[Hanni El Khatib](#)

Will the guns come out, out, out  
Oh will the guns come out and play today Oh will the guns come out, out, out  
Oh will the guns come out and play today Oh will the guns come out, out, out  
Oh will the guns come out and play today Oh will the guns come out, out, out  
Oh will the guns come out and play today Will you lose that job that you don't love  
Or will the lord come down and save your fate Will your woman go and cheat behind your back  
And will your best friend lie right to your face Will you put down money that you don't have  
Will you go and gamble that life away Will you lose that love that you always had  
And they people you look up to every day Oh will the guns come out, out, out  
Oh will the guns come out and play today Oh will the guns come out, out, out  
Oh will the guns come out and play today Oh will the guns come out, out, out  
Oh will the guns come out and play today Oh will the guns come out, out, out  
Oh will the guns come out and play today
