Love Always Finds a Way

Jed Madela

We've said it all
A thousand times before
I've been to the wall
And always found somewhere to turn
There was always more to learnwe've reached the end
And almost closed the door
And someone went in
I never can remember who
All I know is that
We found the strength to make it throughlove always finds a way
When the clouds have no silver linings
She comes through shining
Love always seeks the light
Through the darkest night
In her small ways
Love always finds a wayholding you near
After the storm has passed
It becomes clear
When all our tears have finally dried
That no matter how we fools
May try to turn the tidelove always finds a way
When the clouds have no silver linings
She comes through shining
Love always seeks the light
Through the darkest night
In her small ways
Love always finds a wayand in those moments when
The magic seems to fade
We must remember then
That's the time to keep on believing
And not be afraidif we can trust
In what we really feel
The two of us
Can hold tomorrow in our hands
All it takes is just a faith
That truly understand that...love always finds a way
When the clouds have no silver linings
She comes through shining
Love always seeks the light

Through the darkest night
In her small ways
Love always finds a way
