## Lost

## **Avenged Sevenfold**

Centuries pass and still the same

War in our blood, some things never change

Fighting for land and personal gain

Better your life, justify our pain

The end is knocking, the end is knockingWe've all been lost for most of this life

(Lost for most of this life)

Everywhere we turn more hatred surrounds us

And I know that most of us just aint right

(Most of us just aint right)

Following the wrong steps, being led by prideHow many lives will we take?

How many hearts destined to break?

Nowhere to run, can't escape

Full of ourselves, tied to our fate

The end is knocking, the end is knockingWe've all been lost for most of this life

(Lost for most of this life)

Everywhere we turn more hatred surrounds us

And I know that most of us just aint right

(Most of us just aint right)

Following the wrong steps, being led by prideWith peace of mind so hard to find

We're dwelling on the drastic signs

Another way to numb our mind

And as you close your eyes tonight and pray for a better life

Youll see it flying helplessly awayWe've all been lost for most of this life

(Lost for most of this life)

Everywhere we turn more hatred surrounds us

And I know that most of us just aint right

(Most of us just aint right)

Following the wrong steps, being led by prideWe've all been lost for most of this life

Everywhere we turn more hatred surrounds us

And I know that most of us just aint right

Following the wrong steps, being led by prideWe've all been lost for most of this life

Everywhere we turn more hatred surrounds us

And I know that most of us just aint right

Following the wrong steps, being led by pride
