

State of Emergency (RTE Radio Version)

Cactus World News

A time of change, a time to rest
Hold out the windows, dig in hard shoulder
You're coming out, to give yourself
To give yourself a fighting chance I've seen those eyes, I know that face
So many search for a resting place
Just give me a word and that's all I need
No time to lose, and I've wasted too much already
Making plans by the 19
Taking action by the noon time
A lonely search in silent halls
Hunters brought around
Wounded in the night by the moon,
Enemy who brings in death
By wearing a 100 different masks The time is closing all around
Your light is small, but I let it shine that much brighter
Every time, every time
Every time I look to you (Guitar solo) I can't embrace, and I love that cause
Throw away the old and creep the emergency
With all you got with all you can give
With all that you have now
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
Time has come, time is right
(Sooner or later that time will come
Sooner or later that time will come)
