

# Faith Hope and Treachery

## Lard

Disconnected, dysfunctional  
Soul mates with nobody else  
Sing a song for the New Ice Age  
Greed has made us lonely Faith, hope and treachery  
Faith, hope and treachery  
Faith, hope and treachery  
Faith, hope and treachery Children of the 80's  
Values shaped by Reagan greed  
Don't stick long with anything  
Going gets tough, change the channel and flee In, out, twist and shout Faith, hope and treachery  
Faith, hope and treachery  
Faith, hope and treachery  
Faith, hope and treachery Everyone's scared of everyone else  
'Specially who they love the most  
No kind act goes unpunished  
Show you care just shows you're weak So take 'em all for what they're worth  
Otherwise they'll get you first  
Number one must be preserved  
Friends aren't for keeps, they're for dessert In, out, twist and shout The years go by, get sick of games  
Warmth gets repressed just like hate  
Reagen children flunk out at love  
It's always someone else's fault It's always someone else's fault  
It's always someone else's fault  
It's always someone else's fault  
It's always someone else's fault  
It's always someone else's fault
