When the Sun Comes Down

Incognito

Its so hard to be myself
When youre around my cool disappears
But you tell me that you light the way
Say its fine to put our hearts on the line
I guess its time to put my faith in you
And let my world undoWhen the sun comes down, will you be around
Stay and light the heavens the whole night through
When the sun comes down will I hear the sound
The whisper of your kisses until the night is throughNever enough time in the day
For me to show what Im feeling for you
And when I tried to hide whats in my eyes
You look at me and your smile makes them shine
And I just want to get right next to you
And let my world undoWhen the sun comes down will you be around
Stay and light the heavens the whole night through
When the sun comes down will I hear the sound
The whisper of your kisses until the night is throughWhen the sun comes down will you be around
Stay and light the heavens the whole night through
When the sun comes down will I hear the sound
The whisper of your kisses until the night is throughWhen the sun comes down will you be around
Stay and light the heavens until the night is though
When the sun comes down will I hear the sound
The whisper of your kisses until the night is throughWhen the sun comes down
When the sun comes down
When the sun comes down
When the sun comes down
When the sun comes down
When the sun comes down
Stay with me until the night is through
