

If You Think About It Call Me

Marie Osmond

I know you're busy, I won't keep you, now
There is something I need to talk to you about
If you think about it call me I've got a question keeping me up nights
Do you ever wish, we'd never said good-bye?
If you think about it call me I've been thinking about all the love we shared
If you think about it call me
All the ways we gave and the ways we cared
We really had some magic there I've been thinking back
Together, is how we ought to be
Do you think about it?
If you think about it call me I keep your memory deep inside my heart
Where you took me when you took me in your arms
If you think about it call me I'm not ashamed to say it first
I miss you, baby, and want it back the way we were
If you think about it call me 'Cause I've been thinking about all the love we made
If you think about it call me
From the light of night till the light of day
I want to love again that way I've been thinking back
Together, is how we ought to be
Do you think about it?
If you think about it call me Love was right for me and you
And if you feel the same way too
I'll be waiting to hear from you I'm not ashamed to say it first
I miss you, baby, and want it back the way we were
If you think about it call me
If you think about it call me Please, call me, do you think about it?
Call me, please call me
do you think about it? Call me
