

# In This Hole

## Cat Power

Here in this hole we have fixed  
We get further and further and further and further  
For what we must do  
We must do  
I saw you asleep beside a hole  
Your skull inside a hole  
Eyes blackened by all thoughts of God  
One absent truth  
One horrible thing you saw  
What you truly wanted to become  
And who you thought I was  
Who you thought I was  
In this hole that we have fixed  
We get further and further and further and further  
For what we must do  
We must do  
I saw you outside that hole  
Your skull outside that hole  
Your mind finally free  
And all the thoughts you thought  
And all the thought I've got
