## Brujeria

Autumn, the time of darkness and decay  
Life's running shorter day by day  
Winter has gripped the land in cold caress  
He's all alone and deeply depressed, she's dead  
Don't you fear the winter, I will keep you safe and warm  
Don't you fear the winter, nothing's gonna do you harm  
Midnight and on the graveyard a storm is rage  
The clods of earth hide his whole life  
Homeless, who's lonely now will be for long  
The wind will drift him on and on like the leaves  
Don't you fear the winter, I will keep you safe and warm  
Don't you fear the winter, come with me, there'll be no harm  
A silent might that has moved you  
Hear your waters stand still  
Striding down to the elder  
Soon you'll meet her again  
Autumn, who's got the time knows nothing yet  
Who cares, but watchful are the dead  
Midnight, it's hard to face and deeply sad  
But you're asleep so don't look back, you're dead  
Don't you fear the winter, I will keep you safe and warm  
Don't you fear the winter, nothing's gonna do you harm  
Don't you fear the winter, I will keep you safe and warm  
Don't you fear the winter, come with me, there'll be no harm
