

# Autopsy

## Becoming the Archetype

Advisory - the following lyrics contain explicit language:

If my body was broken open  
And You could look inside  
Would You only find flesh?  
Just the useless parts of an obsolete machine  
Would there be any sign of life  
Or would You only find death?  
Would there be any evidence  
Of a human soul trying to escape?  
If a flame once burned within this shell  
Set me on fire one last time  
Is there a clear division of soul and spirit  
Marrow and joint?  
Can the human body still give You glory  
Even in death?  
May the ashes tell the story  
Of what work was done within  
May my soul pause to witness  
As this body goes up in flame  
Set me on fire
