

# Lucky

311

I'm takin' to the bridge and there's a different country  
I'm bringing with me the people I know deep down are funky  
Oh yeah, we damp we got the juice it's on tap  
Never take the time to rewind all the weak crap  
Here take it it's yours the gift is calling  
The sunshine be falling our way first every morning  
I'm a magician you see I'm christened with condition  
Held over from a future would I've come to you so listen There's a place out in deep space  
Where all the brothers chant and dance and rant  
And shave their heads like Buddha  
I'm a fly guy you know I'm smoother  
Of course no remorse is felt for all those loser crews I do not care what you do, I always screw up  
But when I do it's nothing like you, I wish you grew up  
You're saying anything like promise to get clean  
Won't kick half dead you fucked up in the head  
Just get him out of here, get him out of here  
Get him out of here, he's making me sick We push a sucker out with much force and much clout  
Didn't want to do it that's not what were about  
But we got to have a limit  
How low can you get it  
Seems about time to change the subject  
And sing about the wise eyed girl that makes me feel good  
And never do I leave misunderstood Oh, [Incomprehensible] feel it  
I know you feel good too  
You got a choice of what you gonna do  
It's like this, that [Incomprehensible]  
Mix a melody with some back chat  
Tell 'em again how can you feel it  
I know you feel good too  
You got a choice of what you're gonna do  
It's like this that [Incomprehensible]  
Mix a melody with some back chat I'm rollin' slow no particular place to go so nothings changed  
The more things stay the same  
The more it doesn't matter to a latter day St. Bernard acting hard  
But I throw down like a crazy retard  
But what cold make a man  
Wanna walk around the school yard with his tool hard  
What could make the switch to call a girl a bitch It probably downed when you couldn't get a date to the prom  
And you were stuck with Bea vis

Let's leave us on a note of positivity  
I'm saying this for levity  
But if I leave it brief I call it brevity  
I said I see the people rocking  
Which means there's no stopping the flow  
And you can just tell 'em that you know Every night yeah we turning up and comin' off live  
Like and final 311 battle breakin' idols  
On the one you never heard before  
You know the hardcore rockin', pumping the dance floor  
Leave ya feet sore lookin' for your Mica tin  
You know the mic is deadly in the mood we in  
Certified not fakin' cool like a Jamaican  
Every time the enemy hear us they will be shakin' I know you feel good too  
You got a choice of what you gonna do  
It's like this, that [Incomprehensible]  
Mix a melody with some back chat  
Tell 'em again, yeah  
I know you feel good too  
You got a choice of what you're gonna do  
It's like this, that [Incomprehensible]  
Mix a melody with some back chat
