

Dinosaur Bones

The Samples

From dinosaur bones to telephones
They call across the country to say they're home
It's something I read that they were dead
A thousand million years still stuck in my head
Like dinosaur bones I saw my face in a fossilized rock
Did someone stop the sun
Did someone forget to set the clock
Like dinosaur bones With a shovel in my hand
I'm gonna last long
I'm gonna find the secret
And then I'll find just what went wrong
From dinosaurs bones
