Falling (Miguel Migs Salted Vocal)

Lisa Shaw

Yeah
So lonely last night and this could be the last time
Im falling behind you and nothing's gonna change my mind
Lost in the shadows, a place where nobody knows. We do!
Im looking for a window on the other side of the afterglow
Im falling far away from you
After all this time
Im falling far away from you
Im falling far away from you
After all this time
Im falling far away from you
Feel like a stranger with everyone around
Looking like you're walking the line and almost underground
Can you see what you're missing or only just yourself (just yourself)
There's a place in the shadows something you can tell
Im falling far away from you
After all this time
Im falling far away from you, Im falling
Im falling far away from you
After all this time
Im falling far away from you (falling)
Feels like Im falling
down
Feels like Im falling
down
Feels like Im falling,
down
Feels like Im falling,
downIm falling...
