'Cause the Night (Factory Team Mix)

Radiorama

The night has come.
You've not come back to me
Love and desire walking on the street
I never tell you
..... make you cry, make you cry
I'm living for you
Forever will be. Baby come back to me, back to meCause the night will make it right
And close to you I will never die
Cause the night, there seems so dark
It's going to shine for you and IThe night has gone.
You didn't come to me
A rising sun is shining down the streets
I never tell you...
