

Good Company

Joseph Pfeifer

David slew the giant with his sling
And his ten thousands he took down
With just one blow from his swing He laid his eyes upon a bathing beauty
One split decision
Now he's the infamously fallen king We're in good company
We're in good company
We're in good company
We're in good company Your friends they whisper and people talk
What happened to that man we knew
He's fallen so far off Guilt and shame hang upon your name
And never go away
But like David get down on your knees
And turn the other way We're in good company
We're in good company
We're in good company
We're in good company Moses Abram Peter John
Samson Jonah
Great men with heavy scars
Noah Jacob Judas Paul
Adam ate the fruit but silence was his fall We're in good company
We're in good company
We're in good company
We're in good company You're not alone
You're not alone We're in good company
We're in good company
