

# Biological

## Snow

Every time I see your face  
My heart begins to race  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
Don't know what happens to me  
But ever time I see you, baby  
It's hard to understand  
I feel a change in my body  
My legs begin to tremble and I can't walk up  
My throat becomes dry and I can't talk up  
My palms get wet and I can't touch up  
And I can't believe  
My body temperature begins to rise  
My eyes feel like they've been hypnotized  
I feel so numb like I'm paralyzed  
You do this to me  
Every time I see your face  
My heart begins to race  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
Every time you come around  
My stomach makes a sound  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
My friends they just laugh at me  
They don't understand what happens to me  
I know I seem like a fool  
There's just no way I can play it cool  
My legs begin to tremble and I can't walk up  
My throat becomes dry and I can't talk up  
My palms get wet and I can't touch up  
And I can't believe  
My body temperature begins to rise  
My eyes feel like they've been hypnotized  
I feel so numb like I'm paralyzed  
You do this to me  
Every time I see your face  
My heart begins to race  
I guess it's all right to say

You've got a lovin' biological reaction on me  
Every time you come around  
My stomach makes a sound  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
Must be the Frankie B jeans  
The way they stick on ya  
Must be your thighs when you walk  
The way they switch on ya  
On the real ma  
I'm intimidated by you  
I've been with mucho models  
They can't compete with you  
I all want to do is walk up and talk to you  
I all want to do is write up my math for you  
But I can't 'cause my body is acting so funny  
'Cause you've got a biological reaction on me  
Every time I see your face  
My heart begins to race  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
Every time you come around  
My stomach makes a sound  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
Every time I see your face  
My heart begins to race  
I guess it's all right to say  
You've got a lovin' biological reaction on me  
Every time you come around  
My stomach makes a sound  
I guess it's all right to say  
You've got a lovin' biological reaction on me
