

Love Grows Wild

Buddy Miller

Here's a place where love grows wild
Where hearts can trust just like a child
A wild thing it don't need a lot
It just grows on what it's got
It stills grows no matter what
I use to be to hard to care
But Till you do you ain't nowhereOnce I just threw love away
But that fool was yesterday
Now my heart is home to stay
Wild grow things on less than a little
And darling I know it'll be
You and me right down the middle where
Love grows wildGave up all those valentines
Now I just want the ones that's mine
I will say I love you so
When I do it you will know
Darling I will never go
Wild grow things on less than a little
And darling I know it will be
You and me right down the middle where
Love grows wildYou give me the sweetest love
You must be straight from above
And your so good at loving me
Your so fine it's plan to see
This was surely meant to be
There's a place where love grows wild
