

You Don't Know Anything

Ivy

By now there's nothing left to say
I just opened your letter
I know you're only human but
I expect something better You let me down again
You drove me to the end And it's so strange
The way you've changed
You knew me well
Now, I can tell you don't know anything By now there's nothing I can say
I just finished your letter
I know you're barely human but
I can get something better You let me down again
You drove me to the end And it's so strange
The way you've changed
You knew me well
Now, I can tell you don't know anything You let me down again
You drove me to the end And it's so strange
The way you've changed
You knew me well
Now, I can tell you don't know anything And it's so strange
The way you've changed
And it's so strange
The way you've changed And it's so strange
And it's so strange
