

# Reflect The Storm

## In Flames

Shot for shot, let the bullets penetrate me  
Embrace me, tell me stories of gold and God's  
The precision in your voice  
Breaks the walls that I built  
Your eyes reach deep in life Take a chance Better cut much bigger than this  
A dark star, spend another day with me  
Get something that doesn't reflect  
It's dark, what I need, I'll take the chance  
Bring me the calm When there's nothing  
Expose the dark side  
Awakened and emotional  
Expose the dark side  
Impossible to tame Away from the eye of the storm  
Away, I find what is real in me Throw yourself into the eye of Chaos  
Infiltrate me, sneak out before I awake  
Take out the trash and burn it  
Try to find a beautiful place to lay  
These fragile bones of mine Away from the eye of the storm  
Away, I find what is real Away from the eye of the storm  
Away, I find what is real in me When there's nothing  
Expose the dark side  
Awakened and emotional  
Expose the dark side  
Impossible to tame Away from the eye of the storm  
Away, I find what is real Away from the eye of the storm  
Away, I find what is real in me Away from the eye of the storm  
Away, I find what is real in me
