

Always

Seapony

When she said I'd love you like no other
And she said our love would last forever
I was young and didn't understand then
 What it was could beat inside of me
 And she believed in ever after
 In a world where all your dreams come true
And if I had a chance I'd tell her a thousand times a day
 That I still need you I can hear you
 Chorus:
 Say you'll always love me
 And be the one to understand
 Take my life and never leave me
And just remember that I'm always near you - always there
 We used to live and laugh about tomorrow
 Running out of precious time we borrow
And there was you and love was all you wanted
 In your heart you'll find where we belong

 And she was always there beside me
 Reaching out and holding me tonight
If I had a chance I'd tell her a thousand times a day
 That I still need you I can hear you
 Chorus
 After love has come and gone
 You wonder what remains
 And you will you have the strength to let
 Your feelings show again
 It's never easy but I tell you
 A thousand times a day
 That I still need you I can hear you
 Chorus(
