

# Eternal Frost

## Winter

The place all frozen still [The glaze of frozen steel]  
Upon the body laid still  
Extracted by sorcery  
Once there was a myth [Once temples of myth] Rivers of fear run cold  
Ice castle formation  
Frozen tears escape eternal frost Hope and desire fade  
Fury in the emperor's eyes  
Cast here for eternity  
Season of the damned [dead] Rivers of fear run cold  
Ice castle formation  
Frozen tears escape eternal frost Forbidden land of sorrow  
At last the winter winds sing  
Scattered ashes of kings  
Gaze at the fallen walls [fallen ones; fallen world] Rivers of fear run cold  
Ice castle formation  
Frozen tears escape eternal frost
