

My Man's Girl

Latif

She was about five foot three
Heavenly complected an' you know me
I ran in her direction 'cause I had to see
If what was goin' on was really goin' on
She had almond eyes
Hair that ran down to her chocolate thighs
Had a playa shook like, ?My, my, my?
Yeah, every word I tried to say
Wouldn't come out right
Baby girl had it goin' on
The way her jeans hugged her hips
Just turned me on
An' the shape of her lips, hotter than the sun
I wish that she could be the one
You used to be my man's girl
I wish that you would be my girl
No matter what people say
Girl, they won't change the way I feel
Girl, you used to be my man's girl
I wish that you could be my girl
Now tell me what I got to say
Just tell me what I got to say
Girl, you got me wanna be
Huggin' all over your body
Wonderin' how to get you down with me
Shorty, don't front 'cause I got what you want
Number one fan
Shorty, I just wanna be your man
'Cause ain't no way that we can't win
So believe it, babe, believe it, baby
Baby girl had it goin' on
The way her jeans hugged her hips
Just turned me on
An' the shape of her lips, hotter than the sun
I wish that she could be the one
You used to be my man's girl
I wish you could be my girl
No matter what people say
It really won't change the way I feel

No, no, you done been my man's girl
Baby, my girl
So baby, just tell me what I gotta do
Just tell me what I got to say
I need you, baby
Even when people try to tell you things about me
Don't believe it, baby
Ain't no limit to what we can grow to be
Can't you see it, baby?
Us against the world
That's how it's supposed to be
Girl, I need you to be with me
You used to be my man's girl
I wish that you would be my girl
No matter what people say
It won't change the way I feel
You used to be my man's girl
I wish that you were my girl
So tell me what I got to say
Just tell me what I got to say
You used to be my man's girl
I wish that you were my girl
No matter what people say
I won't change the way I feel
Girl, you used to be my man's girl
Be my girl
So tell me what I got to say
Just tell me what I got to say
