

# Float

[Anthony Hamilton](#)

Could it be your nice silky tone  
Oh that makes me want you girl  
Distant nights spent love on the phone  
As I touch myself, how I want you more  
The mood evokes, incense smoke  
And I'm burning up in temperature, ready to explode  
Come take a toke, let's float, baby on higher ground[Chorus: x2]  
Baby come, float with me  
Let me take, you to a place on higher honey  
Baby come, float with me  
Face to face, build a body of fire honey  
Could it be your sweet sweet moan  
While I'm inside your world your world  
A sudden glance that you give from across the room  
Come and take control yeah  
Open up my favorite bottle, let the wind blow  
Create an atmosphere, stay right here  
Listen to the rain, your hand prints on the window pane  
And its burning me up with the desire oh  
When I think about it, I don't want to be without it  
Baby grab a hold, feel me in your soul  
Forever more climb on  
You belong to me  
When I think about it, I don't want to be without it  
Baby grab a hold, feel me in your soul  
Forever more climb on  
You belong to me[Chorus: x2]  
Call me, write me, love me, come home  
Call me, write me, love me, come home
