

Blue Haze

Suicide Silence

Empty eyes stare into backlit lies
Stare your life away
That is the escape
Face the world, do not hide
Rip out the chord before it takes your lifeHidden behind that little screen
We think we know everything
So quick to talk all that shit
You're all so afraid
You speak words made of blades
Behind a blue light hazeA nation sedated by digitalization
You could say I give a fuck
You could say I give a fuckHidden behind that little screen
We think we know everythingDeath to a blue haze world
Death to a planet with inhuman soul
Death to this fucking blue haze world
Death to the reason we've lost all controlEmpty eyes stare into backlit lies
Stare your life away
That is the escape
Face the world, do not hide
Rip out the chord before it takes your lifeHidden behind that little screen
HangingBut I can see you hanging
But I can see you hanging
DeadHidden behind that little screen
We think we know everythingDeath to a blue haze world
Death to a planet with inhuman soul
Death to this fucking blue haze world
Death to the reason we've lost all control
