

# Take Me There

Jackie Evancho

Where the days sleep darker and the nights mourn cold  
Oh the fear is broken when there's you to hold  
Never doubt luck when stung but I feel for you  
(You are not insulting (very unclear)) I will follow you  
Take me there, take me there with you  
I don't know where but I hold on to you  
So take me there, take me there with you,  
If the road wide open and the day break near  
I could never fathom a life without you here  
Take me there, take me there with you  
I don't know where but I hold on to you  
So take me there, take me there with you  
I will see you there, everything you do  
Take me there, take me there with you
