

Explosions

Echo & The Bunnymen

No!
No sun on the horizon
And I need to know
How the light goes on
It's so numb
On the tip of my tongue
And I need to know
How the fight goes on One more round (one more round)
Give one more round (one more round) Explosions
Always make that sound
Holes blown in the ground
Like the world is falling down Erosion
Always worse lit down
Follows me around
Till my leaves are turning brown No hush
In my stethoscope
And I need to know
When my heartbeat's gone
Ain't not much
Neither breath nor hope
And I need to know
How to right these wrongs Give the light back on (light back on)
Light back on (light back on) Explosions
Always make that sound
Holes blown in the ground
Like the world is falling down
Oceans
Full of cargo bound
The world's a Mach-o-found
Beyond the seas
Where sailors drown Explosions, explosions, explosions, explode around
Explosions, explosions, explosions, explode around
Give what you want now (what you want)
Give what you can (while you can)
Take what you want now (what you want)
Take what you can (what you can) No sign that I'll ever find
What I need to know;
Where I belong
And no sight of a guiding light

I need to know
Where the road has goneExplosions
Always make that sound
Holes blown in the ground
Like the world is falling down
Oceans
Full of cargo bound
The world's a Mach-o-found
Beyond the seas
Where sailors drownDevotion
Always wears a crown
Always leaves me down
To pray one day my prayers are foundExplosions
Always make that sound
Holes blown in the ground
Like the world is falling downExplosions, explosions, explosions, explo-oohh-sion
Explosions, explosions, explosions, explo-oohh-sion
Explosion explo-oohh-sion
Explosion explo-oohh-sion
