

# Over My Head

## Il's

    baby, i'm tryin' to make some sense  
    of all we should've learned from experience  
        we win, we lose, we conquer and we fail  
            one part serious, do or die  
            another part crush in junior high  
        i'm chasing my emotions like a tail  
            i can still move my fingers  
            but i can't seem to let go  
        the cold winds are blowing, i should be goin'  
            i'm in over my head  
        without even blinkin' you've got me thinkin'  
            i would be better off dead  
            yeah, i'm in over my head  
        you made me weak, i made you laugh  
        driving through the rain in a yellow cab

    the taste of your kiss is with me even now  
    but this thing we've got goes by different names  
        never two days in a row the same  
        i wanna stop feelin' this, but don't know how  
            i see my legs and they're moving  
            but i just can't walk away  
                chorus  
        i'll say goodbye, but talk is cheap  
        i count the memories in my sleep  
        i've had enough but i want more  
        makin' me weak, makin' you laugh  
        driving through the rain in that yellow cab  
        baby, your kiss is with me even now  
                chorus
